

Agentic AI

AI WORKSHOP SWITZERLAND

Design reliable AI agents with governance, tools and human review.

Design AI agents your team can actually trust. Map real workflows to governed agents using the Agent Design Canvas, understand MCP connections, and leave with a pilot roadmap — without losing human judgement or review.

Agent Design Canvas — a reusable structure for every agent brief

MCP explained in plain business language

A governed agent brief with source rules and refusal logic

Human review checkpoints and audit patterns

4 hours

Corporate training · Switzerland

GDPR & Swiss FADP aware

aiworkshop.ch

Built for **Swiss teams**

Hands-on corporate AI training delivered on-site across Switzerland — with governance, templates, and adoption built in.

WHO SHOULD ATTEND

- Operations teams, leadership groups, finance, product and IT professionals who want to move from AI experimentation to governed, reliable agent workflows — without losing human review or source quality.

FORMAT

- Format: hands-on workshop · 4 hours

KEY TAKEAWAYS

- Agent Design Canvas — a reusable structure for every agent brief
- MCP explained in plain business language
- A governed agent brief with source rules and refusal logic
- Human review checkpoints and audit patterns
- A pilot roadmap with owner, timeline and success metric

DELIVERY

On-site at your office or venue · English, German, French, Italian · Zurich, Geneva, Lausanne, Basel, Bern, and nationwide.

Program overview

Module 1 of 2 — practical exercises, real workflows, and reviewable outputs.

Program overview

Format: hands-on workshop · 4 hours

Introduction to Agentic AI

- Understand the move from passive chatbots to active agents that perceive, reason, plan and act toward a business goal.

Memory, Planning and Context

- Learn how short-term memory, long-term memory, retrieval and planning strategies support complex multi-step work.

Tool Use and Function Calling

- Design tool schemas that let models interact with APIs, databases and business systems safely.

Program overview

Module 2 of 2 — practical exercises, real workflows, and reviewable outputs.

Multi-Agent Orchestration

- Explore when multiple agents help, how to divide responsibilities and how to avoid brittle autonomous workflows.

Governance and Human Review

- Define approvals, escalation rules, logging and ownership so agent workflows remain auditable.

Pilot Roadmap

- Select realistic first use cases and leave with a backlog for implementation, measurement and scale-up.
