

AI for Business Intelligence

AI WORKSHOP SWITZERLAND

From Reactive Reports to Self-Driving Insights

Modern BI isn't just about visualizing what happened. This workshop helps your team move beyond dashboards using agentic AI, predictive models, and multi-agent workflows to uncover insights, automate decisions, and tell better data stories with less effort.

Agentic AI workflows

Predictive analytics

Autonomous reporting

4 hours

Corporate training · Switzerland

GDPR & Swiss FADP aware

aiworkshop.ch

Built for **Swiss teams**

Hands-on corporate AI training delivered on-site across Switzerland — with governance, templates, and adoption built in.

WHO SHOULD ATTEND

- Managers, engineers, business analysts, BI specialists, and data scientists who want to turn AI from a concept into practical value inside their organization.

FORMAT

- Format: hands-on workshop · 4 hours

KEY TAKEAWAYS

- Agentic AI workflows
- Predictive analytics
- Autonomous reporting

DELIVERY

On-site at your office or venue · English, German, French, Italian · Zurich, Geneva, Lausanne, Basel, Bern, and nationwide.

Program overview

Module 1 of 3 — practical exercises, real workflows, and reviewable outputs.

Program overview

Format: hands-on workshop · 4 hours

Next-Generation BI

- Move from descriptive analytics to predictive and prescriptive decision support, using AI to create foresight instead of only hindsight.

Augmenting BI with Agentic AI

- Learn how autonomous agents observe, reason and act across systems, including MCP patterns and multi-agent collaboration.

AI-Enhanced Dashboards

- Embed predictive models into Power BI, Tableau or Looker to surface trends, alerts and recommended actions.

Program overview

Module 2 of 3 — practical exercises, real workflows, and reviewable outputs.

AI-Powered Exploration

- Ask business questions in natural language and let AI agents fetch, analyze and summarize answers without manual slicing.

Predictive and Prescriptive Analytics

- Design smart alerts and what-if scenarios that help teams forecast outcomes and choose better actions.

Autonomous Reporting and Narrative Generation

- Create reports that explain themselves with audience-specific summaries, metrics and business narratives.

Program overview

Module 3 of 3 — practical exercises, real workflows, and reviewable outputs.

Governance, Ethics, and Model Trust

- Apply a practical governance checklist for transparency, fairness, reliability and stakeholder trust.

Agentic Use Case Sprint

- Prototype an agentic workflow, such as one agent monitoring anomalies, one analyzing root causes and one preparing a daily report.
